---

### Districts Strategic Plan

**Equity Goal** Close achievement gaps between high/low performing groups through access to high-quality learning opportunities.

**Excellence Goal** Increase student achievement through standards-based teaching and learning.

**Strategy 1:** Stimulate learning and teaching, customize students' experiences, and design learning environments.

**Strategy 2:** Collaborate with stakeholders (e.g., BOE, parents, students, staff, community members, and local government) to achieve excellence and equity.

**Strategy 3:** Develop system capacity (e.g., resources, commitment, teamwork, beliefs, processes) to ensure excellence and equity.

---

*The key to an effective and mutually benefiting partnership is a focused project, shared vision, and collaborative spirit.  
Building dynamic partnerships ensure students authentic learning experiences that prepare them to enter the 21<sup>st</sup> century workplace.*

---

## Worksheet to help you plan your partnerships

---

Key points to keep in mind when creating learning environments:

- Create real world experience,
- analyze data to look at trends,
- Suggest possible trade-offs to decisions that are being made,
- Allow students ownership in ideas that can benefit the district.
