

HealthAssistSM

A Product of **PUBLIC SCHOOL WORKS**

PublicSchoolWORKS now offers HealthAssist, built specifically for k-12 school districts to monitor the safety and wellness of all district employees due to COVID-19.

HealthAssist is designed to perform an automated daily symptom check of all employees entering the campus. Both district and school appointed employees are alerted about any health concerns. The system also identifies those who do not complete the assessment.

HealthAssist can also be customized based on your districts requirements.

Our team will guide you through a simple and brief implementation process, and will train you on our turn-key solution, while also providing additional support materials.

HealthAssist will integrate with your HR system for employee data. This gives you real-time information and a complete view of your district's daily readiness.

HealthAssist Provides:

Daily Automated Emails

- Sent every morning asking employees to answer a few short questions regarding their health

Response Tracking

- Responses are immediately recorded into HealthAssist

Reports Sent to Key Personnel

- Sent before school starts alerting employee health status, the need for substitutes, and non-responses

Work Authorization

- Employee receives automated notice to report to work

Smarter Solutions. Safer Schools.
